 - Cable Drive Waste & Overflow
 - PVC Waste & Overflow
 - Linear Waste & Overflow

INSTALLATION TIPS

1. Install according to Owner's Manual and local codes.
2. Airbath V units may be 1½" - 2½" higher than stated.
3. Any whirlpool or Airbath® unit requires an access panel.
4. Hot water supply should be 65-75% of tub capacity or greater.
5. Cut Dimensions: 2" Smaller than Size of tub. It is recommended to wait for unit to arrive before cutting.
6. Always consult your local plumber for recommendations as installations will vary.
7. The combination of multiple systems and options may require components to stick out and/or be remotely installed in the field.
8. All specifications are subject to change without notice.
 - Certain options or altering the pump/blower location may cause the pump/blower to extend beyond the tub decking.
 - The combination of multiple systems and options may require components to stick out and/or be remotely installed in the field.
 - Factory installed aprons may increase the overall height of the tub when ordered with certain accessories (ie. Linear Drain).

ELECTRICAL REQUIREMENTS

Americh recommends one 20 amp ground fault circuit interrupter (GFCI) for each power supply provided with the bathtub.
